1. Organization and nature of operations

ZW Data Action Technologies Inc. (formerly known as ChinaNet Online Holdings, Inc.*) (the "Company") was incorporated in the State of Texas in April 2006 and re-domiciled to become a Nevada corporation in October 2006. On June 26, 2009, the Company consummated a share exchange transaction with China Net Online Media Group Limited (the "Share Exchange"), a company organized under the laws of British Virgin Islands ("China Net BVI"). As a result of the Share Exchange, China Net BVI became a wholly owned subsidiary of the Company and the Company is now a holding company, which, through certain contractual arrangements with operating companies in the People's Republic of China (the "PRC"), is engaged in providing advertising, precision marketing, online to offline (O2O) sales channel expansion and the related data and technical services to small and medium enterprises ("SMEs") in the PRC. In early 2018, the Company commenced to expand its business into the blockchain industry and the related technology. As of September 30, 2020, the Company was in the process of developing its blockchain-powered platform applications (See Note 11).

2. Variable interest entities

3. Summary of significant accounting policies

a) Basis of presentation

The unaudited condensed consolidated interim financial statements are prepared and presented in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP").

The unaudited condensed consolidated interim financial information as of September 30, 2020 and for the nine and three months ended September 30, 2020 and 2019 have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC"). Certain information and footnote disclosures, which are normally included in complete consolidated financial statements prepared in accordance with U.S. GAAP, have been omitted pursuant to those rules and regulations. The unaudited condensed consolidated interim financial information should be read in conjunction with the financial statements and the notes thereto, included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2019, previously filed with the SEC (the "2019 Form 10-K") on May 27, 2020.

In the opinion of management, all adjustments (which include normal recurring adjustments) necessary to present a fair statement of the Company's condensed consolidated financial position as of September 30, 2020, its condensed consolidated results of operations for the nine and three months ended September 30, 2020 and 2019, and its condensed consolidated cash flows for the nine months ended September 30, 2020 and 2019, as applicable, have been made. The interim results of operations are not necessarily indicative of the operating results for the full fiscal year or any future periods.

b) Going concern

The Company incurred operating losses and may continue to incur operating losses, and as a result, to generate negative cash flows as the Company implements its future business plan. The Company's net loss attributable to stockholders for the nine and three months ended September 30, 2020 was approximately US\$4.61 million and US\$1.33 million, compared with approximately US\$1.91 million and US\$0.39 million for the nine and three months ended September 30, 2019, respectively. As of September 30, 2020, the Company had cash and cash equivalents of approximately US\$0.50 million, compared with approximately US\$1.60 million as of December 31, 2019.

The Company does not currently have sufficient cash or commitments for financing to sustain its operation for the twelve months from the issuance date of these financial statements. The Company plans to optimize its internet resources cost investment strategy to improve the gross profit margin of its core business and to further strengthen the accounts receivables collection management and negotiate with vendors for more favorable payment terms, all of which will help to substantially increase the cashflows from operations. However, the COVID-19 outbreak incurred in the first fiscal quarter of 2020 in the PRC has had and may continue to have an adverse effect on the Company's business operations and cashflows. If the Company fails to achieve these goals, the Company may need additional financing to execute its business plan. If additional financing is required, the Company cannot predict whether this additional financing will be in the form of equity, debt, or another form, and the Company may not be able to obtain the necessary additional capital in a timely manner, on acceptable terms, or at all. In the event that financing sources are not available, or that the Company is unsuccessful in increasing its gross profit margin and reducing operating losses, the Company may be unable to implement its current plans for expansion, repay debt obligations or respond to competitive pressures, any of which would have a material adverse effect on the Company's business, prospects, financial condition and results of operations. These factors raise substantial doubt about the Company's ability to continue as a going concern within one year after the date that the financial statements are issued.

The unaudited condensed consolidated financial statements as of September 30, 2020 have been prepared under the assumption that the Company will continue as a going concern, which contemplates, among other things, the realization of assets and the satisfaction of liabilities in the normal course of business over a reasonable period of time. The Company's ability to continue as a going concern is dependent upon its uncertain ability to increase gross profit margin and reduce operating loss from its core business and/or obtain additional financing. The accompanying financial statements as of September 30, 2020 do not include any adjustments that might result from the outcome of these uncertainties. If the Company is unable to continue as a going concern, it may have to liquidate its assets and may receive less than the value at which those assets are carried on the financial statements.

c) Principles of consolidation

The unaudited condensed consolidated interim financial statements include the accounts of all the subsidiaries and VIEs of the Company. All transactions and balances between the Company and its subsidiaries and VIEs have been eliminated upon consolidation.

d) Use of estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the related disclosure of contingent assets and liabilities at the date of these consolidated financial statements, and the reported amounts of revenue and expenses during the reporting period. The Company continually evaluates these estimates and assumptions based on the most recently available information, historical experience and various other assumptions that the Company believes to be reasonable under the circumstances. Since the use of estimates is an integral component of the financial reporting process, actual results could differ from those estimates.

e) Foreign currency translation

The exchange rates used to translate amounts in RMB into US\$ for the purposes of preparing the condensed consolidated financial statements are as follows:

	September 30, 2020	December 31, 2019
Balance sheet items, except for equity accounts	6.8101	6.9762
	Nine Months End	ed September 30,
	2020	2019
Items in the statements of operations and comprehensive loss	6.9917	6.8541
	Three Months End	led September 30,
	2020	2019
Items in the statements of operations and comprehensive loss	6.9205	6.9872

No representation is made that the RMB amounts could have been, or could be converted into US\$ at the above rates.

f) Fair value measurement

Liabilities measured at fair value on a recurring basis by level within the fair value hierarchy as of September 30, 2020 and December 31, 2019 are as follows:

11. Blockchain software application platform development costs

In February 2018, the Company entered into a technical development contract with an unrelated entity to develop a blockchain technology-based platform application for internal use by the Company. Total amount of the contract was US\$4.5 million. In March 2018, the Company entered into a RMB3.0 million (approximately US\$0.44 million) social network-based software application development contract with another unrelated entity, which software application the Company had further combined into the current under developing blockchain technology-based platform. These two blockchain technology-based applications are named OMG and Bo!News, respectively. As of September 30, 2020 and December 31, 2019, in accordance with ASC 350-40 "Intangibles-Goodwill and Other-Internal-Use Software", the Company capitalized approximately US\$4.19 million and US\$3.88 million development costs in the aggregate under these two contracts, respectively. As of the date hereof, the Company is in the process of further developing and adjusting its blockchain-powered applications on the blockchain infrastructure platform to make the platform a better synergism with the current business and client base. The Company originally scheduled to complete the adjustments and upgrades of Bo!News, to launch the OMG for trial by the end of May 2020, and to complete the integration of BO!News and OMG for commercial release by the end of 2020. However, due to the COVID-19 outbreak in China during the first fiscal quarter of 2020, the Company currently anticipates that the commercial releasing schedule will likely be postponed.

According to the development contracts the Company signed with the counter parties, the Company will not bear any development risk related loss unless the counter party has no fault during the development and the causes for failure is considered reasonable as agreed by both parties. In the latter case, the related development loss will be shared by both parties based on further negotiations. As of the date hereof, the Company has not been aware of any technical risks or other factors that may lead to any failure or partial failure of these development projects.

12. Long-term prepayments

As of September 30, 2020, long-term prepayments represented a portion of the Company's prepayments, of which approximately US\$0.37 million was paid to one of its advertising resource suppliers and the remaining approximately US\$0.10 million was paid to one of its professional service suppliers. The Company recorded these amounts as long-term prepayments because they were not expected to be consumed within one year of September 30, 2020.

13. Short-term bank loan and credit facility

As of December 31, 2019, the Company had a revolving credit facility of RMB5.0 million (approximately US\$0.7 million) for short-term working capital loans granted by a major financial institution in China, which expired in January 2020.

As of December 31, 2019, under the revolving credit facility, the Company borrowed RMB3.0 million (approximately US\$0.43 million) short-term bank loan, which matured and was repaid in January 2020.

Bad debts provision	890	743
Valuation allowance	(10,223)	(9,190)
Deferred tax assets, net	815	713

The U.S. holding company has incurred aggregate NOLs of approximately US\$22.8 million and US\$20.3 million as of September 30, 2020 and December 31, 2019, respectively. The NOLs carryforwards as of December 31, 2017 gradually expire over time, the last of which expires in 2037. NOLs incurred after December 31, 2017 will no longer be available to carry back but can be carried forward indefinitely, subject to an annual limit of 80% on the amount of taxable income that can be offset by NOLs arising in tax years ending after December 31, 2017. The Company maintains a full valuation allowance against its net U.S. deferred tax assets, since due to uncertainties surrounding future utilization, the Company estimates there will not be sufficient future earnings to utilize its U.S. deferred tax assets.

The NOLs carried forward incurred by the Company's PRC subsidiaries and VIEs were approximately US\$25.2 million and US\$23.6 million as of September 30, 2020 and December 31, 2019, respectively. The losses carryforwards gradually expire over time, the last of which expires in 2030 due to certain subsidiary enjoys the High and New Technology Enterprise's privileged NOLs carryforward policy. The related deferred tax assets were calculated based on the respective NOLs incurred by each of the PRC subsidiaries and VIEs and the respective corresponding enacted tax rate that will be in effect in the period in which the losses are expected to be utilized.

The Company recorded approximately US\$10.22 million and US\$9.19 million valuation allowance as of September 30, 2020 and December 31, 2019, respectively, because it is considered more likely than not that a portion of the deferred tax assets will not be realized through sufficient future earnings of the entities to which the operating losses related.

For the nine and three months ended September 30, 2020, the Company recorded approximately US\$0.90 million and US\$0.14 million deferred tax valuation allowance, respectively. For the nine months ended September 30, 2019, the Company recorded approximately US\$0.42 million deferred tax valuation allowance. For the three months ended September 30, 2019, the Company reversed approximately US\$0.03 million deferred tax valuation allowance.

16. Long-term borrowing from a director

Long-term borrowing from a director is a non-interest bearing loan from a director of the Company relating to the original paid-in capital contribution in the Company's wholly-owned subsidiary Rise King WFOE, which is not expected to be repaid within one year.

17. Warrant liabilities

The Company consummated a registered direct offering in January 2018 (the "2018 Financing"), as part of the transaction, the Company issued to the investors and the placement agent warrants to purchase up to 645,000 shares and 129,000 shares of the Company's common stock at an exercise price of \$6.60 per share, respectively. The Company accounted for these warrants as derivative liabilities. As a result, these warrants were remeasured at fair value as of each reporting date with changes in fair value be recorded in earnings in each reporting period.

Fair value of the warrants

The Company used Binomial model to determine the fair value of the Warrants based on the assumptions summarized as below:

18. Restricted net assets

As substantially all of the Company's operations are conducted through its PRC subsidiaries and VIEs, the Company's ability to pay dividends is primarily dependent on receiving distributions of funds from its PRC subsidiaries and VIEs. Relevant PRC statutory laws and regulations permit payments of dividends by its PRC subsidiaries and VIEs only out of their retained earnings, if any, as determined in accordance with PRC accounting standards and regulations and after it has met the PRC requirements for appropriation to statutory reserves. Paid in capital of the PRC subsidiaries and VIEs included in the Company's consolidated net assets are also non-distributable for dividend purposes.

In accordance with the PRC regulations on Enterprises with Foreign Investment, a WFOE established in the PRC is required to provide certain statutory reserves, namely general reserve fund, the enterprise expansion fund and staff welfare and bonus fund which are appropriated from net profit as reported in the enterprise's PRC statutory accounts. A WFOE is required to allocate at least 10% of its annual after-tax profit to the general reserve until such reserve has reached 50% of its registered capital based on the enterprise's PRC statutory accounts. Appropriations to the enterprise expansion fund and staff welfare and bonus fund are at the discretion of the board of directors. The aforementioned reserves can only be used for specific purposes and are not distributable as cash dividends. Rise King WFOE is subject to the above mandated restrictions on distributable profits. Additionally, in accordance with the Company Law of the PRC, a domestic enterprise is required to provide a statutory common reserve of at least 10% of its annual after-tax profit until such reserve has reached 50% of its registered capital based on the enterprise's PRC statutory accounts. A domestic enterprise is also required to provide for a discretionary surplus reserve, at the discretion of the board of directors. The aforementioned reserves can only be used for specific purposes and are not distributable as cash dividends. All of the Company's other PRC subsidiaries and PRC VIEs are subject to the above mandated restrictions on distributable profits.

In accordance with these PRC laws and regulations, the Company's PRC subsidiaries and VIEs are restricted in their ability to transfer a portion of their net assets to the Company. As of September 30, 2020 and December 31, 2019, net assets restricted in the aggregate, which include paid-in capital and statutory reserve funds of the Company's PRC subsidiaries and VIEs that are included in the Company's consolidated net assets, were both approximately US\$6.21 million.

The current PRC Enterprise Income Tax ("EIT") Law also imposes a 10% withholding income tax for dividends distributed by a foreign invested enterprise to its immediate holding company outside China. A lower withholding tax rate will be applied if there is a tax treaty arrangement between mainland China and the jurisdiction of the foreign holding company. Holding companies in Hong Kong, for example, will be subject to a 5% withholding tax rate, subject to approval from the related PRC tax authorities.

The ability of the Company's PRC subsidiaries and VIEs to make dividends and other payments to the Company may also be restricted by changes in applicable foreign exchange and other laws and regulations.

Foreign currency exchange regulation in China is primarily governed by the following rules:

- 1 Foreign Exchange Administration Rules (1996), as amended in August 2008, or the Exchange Rules;
- 1 Administration Rules of the Settlement, Sale and Payment of Foreign Exchange (1996), or the Administration Rules.

Currently, under the Administration Rules, Renminbi is freely convertible for current account items, including the distribution of dividends, interest payments, trade and service related foreign exchange transactions, but not for capital account items, such as direct investments, loans, repatriation of investments and investments in securities outside of China, unless the prior approval of the State Administration of Foreign Exchange (the "SAFE") is obtained and prior registration with the SAFE is made. Foreign-invested enterprises like Rise King WFOE that need foreign exchange for the distribution of profits to its shareholders may effect payment from their foreign exchange accounts or purchase and pay foreign exchange rates at the designated foreign exchange banks to their foreign shareholders by producing board resolutions for such profit distribution. Based on their needs, foreign-invested enterprises are permitted to open foreign exchange settlement accounts for current account receipts and payments of foreign exchange along with specialized accounts for capital account receipts and payments of foreign exchange banks.

Although the current Exchange Rules allow converting of Chinese Renminbi into foreign currency for current account items, conversion of Chinese Renminbi into foreign exchange for capital items, such as foreign direct investment, loans or securities, requires the approval of SAFE, which is under the authority of the People's Bank of China. These approvals, however, do not guarantee the availability of foreign currency conversion. The Company cannot be sure that it will be able to obtain all required conversion approvals for its operations or the Chinese regulatory authorities will not impose greater restrictions on the convertibility of Chinese Renminbi in the future. Currently, most of the Company's retained earnings are generated in Renminbi. Any future restrictions on currency exchanges may limit the Company's ability to use its retained earnings generated in Renminbi to make dividends or other payments in U.S. dollars or fund possible business activities outside China.

19. Employee defined contribution plan

Full time employees of the Company in the PRC participate in a government mandated defined contribution plan, pursuant to which certain pension benefits, medical care, employee housing fund and other welfare benefits are provided to employees. Chinese labor regulations require that the PRC subsidiaries of the Company make contributions to the government for these benefits based on certain percentages of the employees' salaries. The employee benefits were expensed as incurred. The Company has no legal obligation for the benefits beyond the contributions made. The total amounts for such employee benefits were approximately US\$0.08 million and US\$0.26 million for the nine months ended September 30, 2020 and 2019, respectively. The total amounts for such employee benefits were approximately US\$0.03 million and US\$0.09 million for the three months ended September 30, 2020 and 2019, respectively.

20. Concentration of risk

Credit risk

Financial instruments that potentially subject the Company to significant concentrations of credit risk consist primarily of cash and cash equivalents and accounts receivable. As of September 30, 2020, substantially all of the Company's cash and cash equivalents were held by major financial institutions located in China. The Company believes that these financial institutions located in China are of high credit quality. For accounts receivable, the Company extends credit based on an evaluation of the customer's financial condition, generally without requiring collateral or other security. In order to minimize the credit risk, the Company delegated a team responsible for credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. Further, the Company reviews the recoverable amount of each individual receivable at each balance sheet date to ensure that adequate allowances are made for doubtful accounts. In this regard, the Company considers that the Company's credit risk for accounts receivable is significantly reduced.

Concentration of customers

The following tables summarized the information about the Company's concentration of customers for the nine and three months ended September 30, 2020 and 2019, respectively:

21. Commitments and contingencies

In 2018, the Company entered into contracts with two unrelated third parties in relation to the development of the Company's blockchain technology-powered platform applications. Total contract amount of these two contracts was approximately US\$4.94 million. As of September 30, 2020, the Company had paid approximately US\$4.19 million in the aggerate, and the remaining unpaid contract amount is expected to be paid during the year ending December 31, 2020.

The Company is currently not a party to any legal or administrative proceedings and are not aware of any pending or threatened legal or administrative proceedings against us in all material aspects. The Company may from time to time become a party to various legal or administrative proceedings arising in its ordinary course of business.

22. Segment reporting

The Company follows ASC Topic 280 "Segment Reporting", which requires that companies disclose segment data based on how management makes decisions about allocating resources to segments and evaluating their performance. Reportable operating segments include components of an entity about which separate financial information is available and which operating results are regularly reviewed by the chief operating decision maker ("CODM"), the Company's Chief Executive Officer, to make decisions about resources to be allocated to the segment and assess each operating segment's performance.

Previously, the Company had four reportable segments, which were Internet advertising and related services, TV advertising service, Blockchain technology and Corporate. From fiscal 2020, the Company has a new reportable segment, which is Ecommerce O2O advertising and marketing services segment. In additional, due to the Company's TV advertising business gradually became dormant since fiscal 2019, and the remaining general operating expenses, net loss and total assets amounts of the Company's TV advertising segment were and are expected to continue be immaterial, the Company combines the results of operations of its TV advertising segment and other disclosure information with its new Ecommerce O2O advertising and marketing services segment in fiscal 2020. As a result, the related disclosures for the respective corresponding periods in fiscal 2019 have been reclassified in comfort with the disclosures in fiscal 2020.

25. Subsequent event

In October 2020, the Company incorporated a new majority-owned subsidiary, Qiweilian (Guangzhou) Technology Co., Ltd. ("Qiweilian"), in which an unrelated party owns 49% and the Company owns 51% equity interest. Qiweilian was established for the development of digital business promotion services to SMEs based on WeChat.

The Company primarily conducts its operations in the PRC. In January 2020, an outbreak of a novel coronavirus (COVID-19) surfaced in Wuhan City, Hubei province of the PRC, and spread all over the country during the first fiscal quarter of 2020. The outbreak caused the Chinese government to require businesses to close, people to quarantine, and also to restrict certain travel within the country. The spread of COVID-19 has resulted in the World Health Organization declaring the outbreak of COVID-19 as a global pandemic. In cooperation with the government authorities, the Company's operating offices (especially that in Xiaogan City, Hubei province) were shut down for approximately one to two months after the Chinese New Year Holiday and were unable to reopen until mid-March or early-April in 2020. The Company's principle business activity is to provide online advertising and marketing services to small and medium enterprises in the PRC, which is particularly sensitive to changes in general economic conditions. The pandemic of COVID-19 in the PRC had caused decreases or delays in advertising spending and had negatively impacted the Company's short-term ability to grow revenues. While the COVID-19 pandemic is still in developing stages worldwide, international stock markets have begun to reflect the uncertainty associated with the slow-down in the global economy and the reduced levels of international travel experienced since the beginning of January 2020, large declines in oil prices and the significant decline in the Dow Industrial Average at the end of February 2020 and beginning of March 2020 was largely attributed to the effects of COVID-19. Although the Chinese government have declared the COVID-19 outbreak largely under control within its border, the Company will continue to assess its financial impacts for the remainder of the year. There can be no assurance that this assessment will enable the Company to avoid part or all of any impact from the spread of COVID-19 or its consequences, including downturns in

Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

You should read the following discussion and analysis of our financial condition and results of operations in conjunction with our consolidated financial statements and the related notes included elsewhere in this interim report. Our consolidated financial statements have been prepared in accordance with U.S. GAAP. The following discussion and analysis contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, including, without limitation, statements regarding our expectations, beliefs, intentions or future strategies that are signified by the words "expect," "anticipate," "intend," "believe," or similar language. All forward-looking statements included in this document are based on information available to us on the date hereof, and we assume no obligation to update any such forward-looking statements. Our business and financial performance are subject to substantial risks and uncertainties. Actual results could differ materially from those projected in the forward-looking statements. In evaluating our business, you should carefully consider the information set forth under the heading "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2019. Readers are cautioned not to place undue reliance on these forward-looking statements.

Overview

Our company was incorporated in the State of Texas in April 2006 and re-domiciled to become a Nevada corporation in October 2006. As a result of a share exchange transaction we consummated with China Net BVI in June 2009, we are now a holding company, which through certain contractual arrangements with operating companies in the PRC, is engaged in providing advertising, precision marketing, online to offline sales channel expansion and the related data and technical services to SMEs in the PRC. Effective October 14, 2020, we changed our corporate name from ChinaNet Online Holdings, Inc. to ZW Data Action Technologies Inc. Our shareholders approved the name change as part of the Company's annual shareholder meeting held on October 12, 2020.

Through our PRC operating subsidiaries and VIEs, we primarily operate a one-stop services for our clients on our Omni-channel advertising, precision marketing and data analysis management system. We offer a variety channels of advertising and marketing services through this system, which primarily include distribution of the right to use search engine marketing services we purchased from key search engines, provision of online advertising placements on our web portals, provision of ecommerce O2O advertising and marketing services as well as provision of other related value-added data and technical services to maximize market exposure and effectiveness for our clients.

To enhance the reliability of our future blockchain services and optimize location for client proximity, we incorporated a new wholly-owned subsidiary, ChinaNet Online (Guangdong) Technology Co., Ltd. ("ChinaNet Online Guangdong") in May 2020 as we are in the process of expanding our corporate business and technology headquarters to the city of Guangzhou in Southern China. ChinaNet Online Guangdong has officially commenced its operations since July 2020. Along with the development of new customer base in southern China in future periods, we plan to gradually transfer a portion of our core business activities to ChinaNet Online Guangdong. We are also currently seeking for new local business partners to develop new high-technology related business, including blockchain services.

In June 2020, we made an investment of RMB0.19 million (approximately US\$0.03 million) in cash to Business Opportunity Chain (Guangzhou) Technology Co., Ltd. ("Business Opportunity Chain Guangzhou"), a newly established entity in which we beneficially own a 19% equity interest. Our investment to Business Opportunity Chain Guangzhou is aiming to further integrate our resources in customer base, media operations and technology for the development of webcast platform based business promotion service and franchise consultancy service.

In October 2020, we incorporated a new majority-owned subsidiary, Qiweilian (Guangzhou) Technology Co., Ltd. ("Qiweilian"), in which an unrelated party owns 49% and we own 51% equity interest. Qiweilian was established for the development of digital business promotion services to SMEs based on WeChat.

Basis of presentation, management estimates and critical accounting policies

Our unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America ("U.S. GAAP") and include the accounts of our company, and all of our subsidiaries and VIEs. We prepare financial statements in conformity with U.S. GAAP, which requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities on the date of the financial statements and the reported amounts of revenues and expenses during the financial reporting period. We continually evaluate these estimates and assumptions based on the most recently available information, our own historical experience and various other assumptions that we believe to be reasonable under the circumstances. Since the use of estimates is an integral component of the financial reporting process, actual results could differ from those estimates. Some of our accounting policies require higher degrees of judgment than others in their application. In order to understand the significant accounting policies that we adopted for the preparation of our condensed consolidated interim financial statements, readers should refer to the information set forth in Note 3 "Summary of significant accounting policies" to our audited financial statements in our 2019 Form 10-K.

Total Revenues: Our total revenues decreased to US\$27.10 million and US\$12.30 million for the nine and three months ended September 30, 2020 from US\$39.53 million and US\$15.51 million for the same periods last year, respectively, which was primarily due to the decrease in revenues from our Internet advertising and distribution of the right to use search engine marketing service business categories, as a result of the COVID-19 outbreak during the first fiscal quarter and slow recovery in the second and third fiscal quarters of 2020.

- Internet advertising revenues for the nine and three months ended September 30, 2020 was approximately US\$5.68 million and US\$2.43 million, respectively, compared with US\$9.38 million and US\$3.95 million for the nine and three months ended September 30, 2019, respectively. The decreases were directly attributable to the COVID-19 outbreak and business shutdown during the first fiscal quarter of 2020 in China, and slow recovery of economy in the following quarters. The decrease in revenues from our Internet advertising has gradually narrowed down to a less than 40% decrease in both the second and third fiscal quarter of 2020, compared with an approximately 50% decrease in the first fiscal quarter of 2020, which indicated a gradual improvement of our business after the COVID-19 outbreak.
- Revenue generated from the distribution of the right to use search engine marketing service for the nine and three months ended September 30, 2020 decreased to approximately US\$18.00 million and US\$8.71 million, respectively, compared with approximately US\$30.13 million and US\$11.55 million for the nine and three months ended September 30, 2019, respectively, due to the same reason as discussed above. The performance of this business category also improved after the COVID-19 outbreak, with the decrease in revenues significantly narrowed down to 38% and 25% in the second and third fiscal quarter of 2020, respectively, compared with a 70% decrease in revenues in the first fiscal quarter of 2020.
- For the nine and three months ended September 30, 2020, we generated an approximately US\$1.28 million and US\$0.27 million Ecommerce O2O advertising and marketing service revenues from the distribution of the advertising spaces in outdoor billboards we purchased from a third party.
- For the nine months and three months ended September 30, 2020, we also generated an approximately US\$1.25 million and US\$0.60 million revenue from providing technical design and support services.

Cost of revenues

Our cost of revenues consisted of costs directly related to the offering of our online advertising, precision marketing and related data and technical services, and cost related to our Ecommerce O2O advertising and marketing service. The following table sets forth our cost of revenues, disaggregated by type of services, by amount and gross profit ratio for the periods indicated, with inter-company transactions eliminated:

Cost of revenues: our total cost of revenues decreased to US\$26.55 million and US\$12.95 million for the nine and three months ended September 30, 2020, respectively, from US\$37.83 million and US\$14.62 million for the nine and three months ended September 30, 2019, respectively. Our cost of revenues primarily consists of search engine marketing resources purchased from key search engines, cost of outdoor advertising resource, license fee paid for providing data and technical services, and other direct costs associated with providing our services. The decrease in our total cost of revenues for the nine and three months ended September 30, 2020 was primarily due to the decrease in costs associated with the distribution of the right to use search engine marketing service we purchased from key search engines and cost related to providing Internet advertising services on our ad portals, which was in line with the decrease in the related revenues as discussed above.

- Costs for Internet advertising and data service primarily consist of cost of internet traffic flow and technical services we purchased from other portals and technical suppliers for obtaining effective sales lead generation to promote business opportunity advertisements placed on our own ad portals. For the nine and three months ended September 30, 2020, our total cost of revenues for Internet advertising and data service decreased to approximately US\$4.90 million and US\$2.00 million, respectively, compared with approximately US\$8.89 million and US\$3.67 million for the nine and three months ended September 30, 2019, respectively, which was in line with the revenues decrease as discussed above. The gross margin rate of our Internet advertising and data service improved to 14% and 18% for the nine and three months ended September 30, 2020, respectively, compared with 5% and 7% for the same periods last year, respectively, which was attributable to our enhancement of data analysis capabilities and optimization of cost control mechanism.
- Costs for distribution of the right to search engine marketing service was direct search engine resource costs consumed for the right to use search engine marketing service we purchased from key search engines and distributed to our customers. We purchased these search engine resources from well-known search engines in China, for example, Baidu, Qihu 360 and Sohu (Sogou) etc. We purchased the resource in relatively large amounts under our own name at a relatively lower rate compared to the market. We charged our clients the actual cost they consumed on search engines for the use of this service and a premium at certain percentage of that actual consumed cost. For the nine and three months ended September 30, 2020, our total cost of revenues for distribution of the right to use search engine marketing service decreased to US\$19.15 million and US\$9.73 million, respectively, compared with US\$28.94 million and US\$10.95 million for the same periods last year, respectively. Gross margin rates of this service for the nine and three months ended September 30, 2020 was -6% and -12%, respectively, as we had to sell the resource pre-purchased from key search engines at a loss to meet our working capital needs and secure our client base under the circumstances of COVID-19 outbreak and slow recovery of economy after the pandemic. We are actively negotiating with our suppliers for more favorable discount, as a result, we anticipant slight improvement of the gross margin rate of this business category in future periods. Gross margin rates of this service was 4% and 5% for the nine and three months ended September 30, 2019, respectively.

- 1 For the nine and three months ended September 30, 2020, cost for our Internet advertising related data and technical service revenue was approximately US\$0.80 million and US\$0.27 million, respectively, which represented the amortized licensee fee for the use of the related data analysis and management system during the periods.
- l For the nine and three months ended September 30, 2020, cost for our Ecommerce O2O advertising and marketing service revenues was approximately US\$1.13 million and US\$0.38 million, respectively, which represented the amortized cost for the related outdoor billboards ad spaces we pre-purchased during the periods.
- 1 For the nine and three months ended September 30, 2020, we also incurred cost for providing technical design and support services of approximately US\$0.58 million.

Gross profit/(loss)

As a result of the foregoing, we generated a gross profit of approximately US\$0.56 million for the nine months ended September 30, 2020 and incurred a gross loss of US\$0.64 million for the three months ended September 30, 2020, compared with gross profit of approximately US\$1.70 million and US\$0.89 million for the nine and three months ended September 30, 2019, respectively. Our overall gross margin was 2% and -5% for the nine and three months ended September 30, 2020, respectively, compared with 4% and 6% for the same periods last year, respectively. The decrease in our overall gross margin for the nine and three months ended September 30, 2020, compared with that in the same periods last year, respectively was primarily attributable to the gross loss rate of -6% and -12% incurred for our main stream of service revenues, i.e. the distribution of the right to search engine marketing service business category, for the nine and three months ended September 30, 2020, respectively, which revenues constituted approximately 66% and 71% of our total revenues for the nine and three months ended September 30, 2020, respectively.

Operating Expenses

Our operating expenses consist of sales and marketing expenses, general and administrative expenses and research and development expenses. The following tables set forth our operating expenses, divided into their major categories by amount and as a percentage of our total revenues for the periods indicated.

Operating Expenses: Our total operating expenses was approximately US\$5.26 million and US\$0.76 million for the nine and three months ended September 30, 2020, respectively, compared with approximately US\$3.94 million and US\$1.17 million for the nine and three months ended September 30, 2019, respectively.

- Sales and marketing expenses: Sales and marketing expenses decreased to US\$0.29 million and US\$0.06 million for the nine and three months ended September 30, 2020, respectively, compared with approximately US\$0.46 million and US\$0.11 million for the nine and three months ended September 30, 2019, respectively. Our sales and marketing expenses primarily consist of advertising expenses for brand development that we pay to different media outlets for the promotion and marketing of our advertising web portals and our services, other advertising and promotional expenses, staff salaries, staff benefits, performance bonuses, travelling expenses, communication expenses and other general office expenses of our sales department. Due to certain aspects of our business nature, the fluctuation of our sales and marketing expenses usually does not have a direct linear relationship with the fluctuation of our net revenues For the nine months ended September 30, 2020, the changes in our sales and marketing expenses was primarily due to the following reasons: (1) staff salary and benefit expenses and general departmental expenses decreased by approximately US\$0.29 million, due to office shutdown during the first fiscal quarter of 2020, resulted from the COVID-19 outbreak during the period and related epidemic control measures imposed by the local governments where we operate, and slow recovery of business performance after the outbreak in the following quarters; and (2) the increase in share-based compensation expenses of approximately US\$0.12 million, related to restricted shares granted and issued to our sales staff during the first fiscal quarter of 2020. For the three months ended September 30, 2020, the decrease in our sales and marketing expenses was primarily attributable to the decrease in performance based salary and bonus expenses, due to significant decrease in net revenues generated in the period, compared with the same period last year, as a result of the slow recovery of economy during the COVID-19 pandemic.
- General and administrative expenses: General and administrative expenses was US\$4.52 million and US\$0.59 million for the nine and three months ended September 30, 2020, respectively, compared with US\$2.88 million and US\$0.82 million for the nine and three months ended September 30, 2019, respectively. Our general and administrative expenses primarily consist of salaries and benefits of management, accounting and administrative personnel, office rentals, depreciation of office equipment, allowance for doubtful accounts, professional service fees, maintenance, utilities and other office expenses. For the nine months ended September 30, 2020, the change in our general and administrative expenses was primarily due to the following reasons: (1) the increase in share-based compensation expenses of approximately US\$1.49 million, due to restricted shares granted and issued in the first fiscal quarter of 2020; and (2) the increase in allowance for doubtful accounts of approximately US\$0.31 million. For the three months ended September 30, 2020, the change in our general and administrative expenses was primarily due to the following reasons: (1) the increase in allowance for doubtful accounts of approximately US\$0.02 million; (2) the decrease in share-based compensation expenses of approximately US\$0.03 million; and (3) the decrease in general departmental expenses of approximately US\$0.22 million, due to cost reduction plan executed by management after the COVID-19 outbreak.
- Research and development expenses: Research and development expenses was approximately US\$0.44 million and US\$0.11 million for the nine and three months ended September 30, 2020, respectively, compared with approximately US\$0.60 million and US\$0.24 million for the nine and three months ended September 30, 2019, respectively. Our research and development expenses primarily consist of salaries and benefits of our research and development staff, equipment depreciation expenses, and office utilities and supplies allocated to our research and development department etc. The decrease in research and development expenses for the nine and three months ended September 30, 2020, compared with that in the respective same period last year, were primarily due to the cost reduction plan executed by the management.

Loss from operations: As a result of the foregoing, we incurred a loss from operations of approximately US\$4.70 million and US\$2.24 million for the nine months ended September 30, 2020 and 2019, respectively. For the three months ended September 30, 2020 and 2019, we incurred a loss from operations of approximately US\$1.40 million and US\$0.28 million respectively.

Change in fair value of warrant liabilities: we issued warrants in our 2018 Financing consummated in January 2018, which we determined that should be accounted for as derivative liabilities, as the warrants are dominated in a currency (U.S. dollar) other than our functional currency (Renminbi or Yuan). As a result, a gain of change in fair value of these warrant liabilities of approximately US\$0.004 million was recorded for the nine months ended September 30, 2020, compared with a gain of approximately US\$0.35 million recorded for the nine months ended September 30, 2019. For the three months ended September 30, 2020, a loss of change in fair value of these warrant liabilities of approximately US\$0.06 million was recorded, compared with a loss of approximately US\$0.12 million recorded for the three months ended September 30, 2019.

Loss before income tax benefit and noncontrolling interests: As a result of the foregoing, our loss before income tax benefit and noncontrolling interest was approximately US\$4.70 million and US\$1.92 million for the nine months ended September 30, 2020 and 2019, respectively. Our loss before income tax benefit and noncontrolling interest was approximately US\$1.49 million and US\$0.41 million for the three months ended September 30, 2020 and 2019, respectively.

Income Tax benefit: For the nine and three months ended September 30, 2020, we recognized an approximately US\$0.09 million and US\$0.16 million income tax benefit, respectively, in relation to deferred tax assets we expect to be able to utilized in future periods. For the nine and three months ended September 30, 2019, we recognized an additional deferred tax benefit of both approximately US\$0.08 million, related to deferred tax assets we expect to be able to utilized in future periods, and these deferred tax benefit amounts recognized were partially offset by the approximately US\$0.07 million and US\$0.06 million of income tax expense incurred for the nine and three months ended September 30, 2019, respectively, through utilization of previously recognized, deferred tax assets, due to earnings generated during the periods by one of our operating entities. As a result, for the nine and three months ended September 30, 2019, we recognized a net income tax benefit of approximately US\$0.01 million and US\$0.02 million, respectively.

Net loss: As a result of the foregoing, for the nine months ended September 30, 2020 and 2019, we incurred a total net loss of approximately US\$4.61 million and US\$1.91 million, respectively. For the three months ended September 30, 2020 and 2019, we incurred a total net loss of approximately US\$1.33 million and US\$0.39 million, respectively.

Net loss attributable to noncontrolling interest: In May 2018, we incorporated a majority-owned subsidiary, Business Opportunity Chain and beneficially owns 51% equity interest in it. For the nine months ended September 30, 2020 and 2019, net loss allocated to the noncontrolling interest of Business Opportunity Chain was approximately US\$0.002 million and US\$0.008 million, respectively. For the three months ended September 30, 2020 and 2019, net loss allocated to the noncontrolling interest of Business Opportunity Chain was approximately US\$nil million and US\$0.003 million, respectively.

Net loss attributable to ZW Data Action Technologies Inc.: Total net loss as adjusted by net loss attributable to the noncontrolling interest shareholders as discussed above yields the net loss attributable to ZW Data Action Technologies Inc. Net loss attributable to ZW Data Action Technologies Inc. was US\$4.61 million and US\$1.91 million for the nine months ended September 30, 2020 and 2019, respectively. Net loss attributable to ZW Data Action Technologies Inc. was approximately US\$1.33 million and US\$0.39 million for the three months ended September 30, 2020 and 2019, respectively.

B. LIQUIDITY AND CAPITAL RESOURCES

Cash and cash equivalents represent cash on hand and deposits held at call with banks. We consider all highly liquid investments with original maturities of three months or less at the time of purchase to be cash equivalents. As of September 30, 2020, we had cash and cash equivalents of approximately US\$0.50 million.

Our liquidity needs include (i) net cash used in operating activities that consists of (a) cash required to fund the initial build-out, continued expansion of our network and new services and (b) our working capital needs, which include deposits and advance payments to search engine resource and other advertising resource providers, payment of our operating expenses and financing of our accounts receivable; and (ii) net cash used in investing activities that consist of the investment to expand technologies related to our existing and future business activities, investment to enhance the functionality of our current advertising portals for providing advertising, marketing and data services and to secure the safety of our general network. To date, we have financed our liquidity need primarily through proceeds we generated from financing activities.

As discussed in Note 3(b) to our unaudited condensed consolidated financial statements, there is substantial doubt about our ability to continue as a going concern within one year after the date that the financial statements are issued. We intend to improve our cashflow status through improving gross profit margin, strengthening receivables collection management, negotiating with vendors for more favorable payment terms and obtaining more credit facilities from banks or other form of financing.

The following table provides detailed information about our net cash flow for the periods indicated:

	Nine Months Ended September 30,

Net cash provided by/(used in) operating activities

For the nine months ended September 30, 2020, our net cash provided by operating activities of approximately US\$0.60 million were primarily attributable to:

- (1) net loss excluding approximately US\$0.63 million of non-cash expenses of depreciation and amortization; approximately US\$2.07 million share-based compensation expenses; approximately US\$0.75 million allowance for doubtful accounts, approximately US\$0.004 million gain in fair value of warrant liabilities and approximately US\$0.09 million deferred tax benefit yielded the non-cash item excluded net loss of approximately US\$1.26 million.
- (2) the receipt of cash from operations from changes in operating assets and liabilities such as:
 - accounts receivable decreased by approximately US\$0.25 million in the aggregate;
- prepayment and deposit to suppliers decreased by approximately US\$1.08 million, primarily due to utilization of the prepayment made to suppliers in fiscal 2019 through Ad resource and other services received from suppliers during the nine months ended September 30, 2020;
- advance from customers increased by approximately US\$0.75 million, primarily due to new advance payments received that related to unsatisfied service performance obligations during the first nine months of 2020, which was partially offset by recognition of revenue from opening contract liabilities during the period;
- accounts payable, tax payables and short-term lease payment payables increased by approximately US\$0.23 million in the aggregate, primarily due to temporary delay of some payments as a result of the COVID-19 outbreak and some of the payments were not due until later periods, and
- amount due from related parties decreased by approximately US\$0.02 million.
- (3) offset by the use from operations from changes in operating assets and liabilities such as:
 - long-term prepayment increased by approximately US\$0.38 million, which prepayment was made for the purchase of ad resource during the first fiscal quarter of 2020, and this amount was not expected to be consumed within one year of September 30, 2020;
 - accruals decreased by approximately US\$0.06 million;
 - other current liabilities decreased by approximately US\$0.04 million; and
 - we also prepaid approximately US\$0.01 million lease payment during the period.

For the nine months ended September 30, 2019, our net cash used in operating activities of approximately US\$4.06 million were primarily attributable to:

- (1) net loss excluding approximately US\$0.07 million of non-cash expenses of depreciation and amortizations; approximately US\$0.09 million amortization of operating lease right-of-use assets; approximately US\$0.31 million share-based compensation; approximately US\$0.45 million allowance for doubtful accounts; approximately US\$0.35 million gain from change in fair value of warrant liabilities and approximately US\$0.01 million deferred tax benefit, yielded the non-cash items excluded net loss of approximately US\$1.37 million.
- (2) the receipt of cash from operations from changes in operating assets and liabilities such as:
- advance from customers and a related party increased by approximately US\$4.16 million, in the aggregate, primarily due to new advance payments received that related to unsatisfied service performance obligations during the first nine months of 2019, which was partially offset by recognition of revenue from opening contract liabilities during the period;
- due from related parties decreased by approximately US\$0.23 million, primarily due to collection of US\$0.2 million from an officer of our company and a portion of a related party loan of approximately US\$0.03 million;
- unpaid lease payments related to short-term lease agreements we entered into during the second and third fiscal quarter of 2019 increased by approximately US\$0.18 million;
- taxes payable increased by approximately US\$0.12 million;
- other current liabilities increased by approximately US\$0.29 million; and
- other current assets decreased by approximately US\$0.01 million.
- (3) offset by the use from operations from changes in operating assets and liabilities such as:
 - accounts receivable increased by approximately US\$0.29 million;
- accounts payable decreased by approximately US\$1.95 million, due to settlement with major suppliers of search engine resource during 2019;
- accruals decreased by approximately US\$0.24 million, due to settlement of these operational liabilities and payment for operating lease liabilities during 2019;
- prepayment and deposit to suppliers increased by approximately US\$5.19 million, primarily due to increase in prepayments for the purchase of search engine resource as required by the major suppliers, and prepayments for the implementation, training and license fees of a software system incurred during the third quarter of 2019; and
- we also prepaid approximately US\$0.01 million lease payment during the period.

Net cash used in investing activities

For the nine months ended September 30, 2020, (1) we invested RMB0.19 million (approximately US\$0.03 million) to a newly established entity, in which we hold a 19% equity interest; (2) we made an additional payment of approximately US\$0.30 million for the development of our blockchain technology-based platform applications; and (3) we lent to an unrelated third party a short-term loan of approximately US\$0.94 million. In the aggregate, these transactions resulted in a cash outflow from investing activities of approximately US\$1.27 million for the nine months ended September 30, 2020.

For the nine months ended September 30, 2019, (1) we contributed our pro-rata share of cash investment of approximately US\$0.04 million to an ownership investee company incorporated in October 2018; and (2) we prepaid US\$0.76 million for the development of a software system. In the aggregate, these transactions resulted in a net cash outflow from investing activities of approximately US\$0.80 million for the nine months ended September 30, 2019.

Net cash (used in)/provided by financing activities

For the nine months ended September 30, 2020, we repaid an approximately US\$0.43 million short-term bank loan matured in January 2020.

For the nine months ended September 30, 2019, (1) we closed on the first half of a private placement with a select group of investors related the Securities Purchase Agreement entered into on August 7, 2019. In connection with the closing, we issued 1,608,430 shares of common stock and received net proceeds of approximately US\$2.39 million, after deduction of approximately US\$0.01 million direct financing cost paid in cash; (2) we repaid approximately US\$0.88 million short-term bank loan, in the aggregate, matured in the first quarter and third quarter of 2019; (3) we re-borrowed approximately US\$0.44 million short-term loan matured in the first quarter of 2019. In the aggregate, these transactions resulted in a net cash inflow from financing activities of approximately US\$1.96 million for the nine months ended September 30, 2019.

Restricted Net Assets

As substantially all of our operations are conducted through our PRC subsidiaries and VIEs, our ability to pay dividends is primarily dependent on receiving distributions of funds from our PRC subsidiaries and VIEs. Relevant PRC statutory laws and regulations permit payments of dividends by our PRC subsidiaries and VIEs only out of their retained earnings, if any, as determined in accordance with PRC accounting standards and regulations and after it has met the PRC requirements for appropriation to statutory reserves. Paid in capital of the PRC subsidiaries and VIEs included in our consolidated net assets are also not distributable for dividend purposes.

In accordance with the PRC regulations on Enterprises with Foreign Investment, a WFOE established in the PRC is required to provide certain statutory reserves, namely general reserve fund, the enterprise expansion fund and staff welfare and bonus fund which are appropriated from net profit as reported in the enterprise's PRC statutory accounts. A WFOE is required to allocate at least 10% of its annual after-tax profit to the general reserve until such reserve has reached 50% of its registered capital based on the enterprise's PRC statutory accounts. Appropriations to the enterprise expansion fund and staff welfare and bonus fund are at the discretion of the board of directors. The aforementioned reserves can only be used for specific purposes and are not distributable as cash dividends. Rise King WFOE is subject to the above mandated restrictions on distributable profits. Additionally, in accordance with the Company Law of the PRC, a domestic enterprise is required to provide a statutory common reserve of at least 10% of its annual after-tax profit until such reserve has reached 50% of its registered capital based on the enterprise's PRC statutory accounts. A domestic enterprise is also required to provide for a discretionary surplus reserve, at the discretion of the board of directors. The aforementioned reserves can only be used for specific purposes and are not distributable as cash dividends. All of our other PRC subsidiaries and PRC VIEs are subject to the above mandated restrictions on distributable profits.

In accordance with these PRC laws and regulations, our PRC subsidiaries and VIEs are restricted in their ability to transfer a portion of their net assets to us. As of September 30, 2020 and December 31, 2019, net assets restricted in the aggregate, which includes paid-in capital and statutory reserve funds of our PRC subsidiaries and VIEs that are included in our consolidated net assets were both approximately US\$6.21 million.

The current PRC Enterprise Income Tax ("EIT") Law also imposes a 10% withholding income tax for dividends distributed by a foreign invested enterprise to its immediate holding company outside China, which were exempted under the previous EIT law. A lower withholding tax rate will be applied if there is a tax treaty arrangement between mainland China and the jurisdiction of the foreign holding company. Holding companies in Hong Kong, for example, will be subject to a 5% rate, subject to approval from the related PRC tax authorities.

The ability of our PRC subsidiaries to make dividends and other payments to us may also be restricted by changes in applicable foreign exchange and other laws and regulations.

Foreign currency exchange regulation in China is primarily governed by the following rules:

- l Foreign Exchange Administration Rules (1996), as amended in August 2008, or the Exchange Rules;
- 1 Administration Rules of the Settlement, Sale and Payment of Foreign Exchange (1996), or the Administration Rules.

Currently, under the Administration Rules, Renminbi is freely convertible for current account items, including the distribution of dividends, interest payments, trade and service related foreign exchange transactions, but not for capital account items, such as direct investments, loans, repatriation of investments and investments in securities outside of China, unless the prior approval of the State Administration of Foreign Exchange (the "SAFE") is obtained and prior registration with the SAFE is made. Foreign-invested enterprises like Rise King WFOE that need foreign exchange for the distribution of profits to its shareholders may effect payment from their foreign exchange accounts or purchase and pay foreign exchange rates at the designated foreign exchange banks to their foreign shareholders by producing board resolutions for such profit distribution. Based on their needs, foreign-invested enterprises are permitted to open foreign exchange settlement accounts for current account receipts and payments of foreign exchange along with specialized accounts for capital account receipts and payments of foreign exchange at certain designated foreign exchange banks.

Although the current Exchange Rules allow converting of Renminbi into foreign currency for current account items, conversion of Renminbi into foreign exchange for capital items, such as foreign direct investment, loans or securities, requires the approval of SAFE, which is under the authority of the People's Bank of China. These approvals, however, do not guarantee the availability of foreign currency conversion. We cannot be sure that it will be able to obtain all required conversion approvals for our operations or the Chinese regulatory authorities will not impose greater restrictions on the convertibility of Renminbi in the future. Currently, most of our retained earnings are generated in Renminbi. Any future restrictions on currency exchanges may limit our ability to use retained earnings generated in Renminbi to make dividends or other payments in U.S. dollars or fund possible business activities outside China.
